Bill Yenne : Cities of Gold: Legendary Kingdoms, Quixotic Quests, and Fantastic New World Wealth before purchasing it in order to gage whether or not it would be worth my time, and all praised Cities of Gold: Legendary Kingdoms, Quixotic Quests, and Fantastic New World Wealth:

The Exploration for Real and Mythical Treasures in the Americas For half a millennium, stories of vast treasures El Dorado, Manoa, the Seven Cities of Cibola, the Lost Dutchman Mine have been part of the lore of the Americas. Long before the Europeans set foot in the New World, myths and rumors of fabulous wealth in distant lands, such as the kingdom of Prester John, were told and retold so often that they were assumed to be true. When Spanish explorers first made contact with the Aztec and Inca civilizations, they found cultures that were literally dripping with gold. This evidence made it easy to believe the native stories of even greater wealth just beyond the horizon. In these uncharted lands, dreamers sought their fortunes: Francisco de Coronado ranged over the North American plains in search of the elusive Quivira; Gonzalo Pizarro, brother of the Incan conqueror, and Lope Aguirre, the Wrath of God, were both part of ill-fated expeditions in search of El Dorado; and Leonard Clark walked out of the Amazon after World War II with gold and claimed he had found that fabled kingdom.

About the Author BILL YENNE is an award-winning author of numerous books of history and popular culture, including the acclaimed biography *Sitting Bull* and *Indian Wars: The Campaign for the American West*, both available from Westholme Publishing.
