Think again. Think of everyday life: How are homes built? How do they make glass? How do carpenters make beautiful cabinetwork? Why should Paul Revere be more famous for his silversmith work than for his "Midnight Ride"? What were the handwork origins of frying pans? Bookbinding? Shipbuilding? That, and countless other things are beautifully and understandably described (with superb black and white drawings) in this book. This classic can actually fire up interests in yourself you never knew you had. Most highly recommended!0 of 0 people found the following review helpful. A must-have book for colonial historians and re-enactorsBy CustomerAwesome book. A must-have for anyone interested in colonial American history or who is serious about becoming a colonial re-enactor.2 of 2 people found the following review helpful. Edwin Tunis was an American Original...By Georgio55I positively loved these books and their illustrations when I was a kid. These books are timeless and as relevant now as they were 45 or more years ago when I read then as a kid.
