**Joseph Mills Hanson : Conquest of the Missouri, The** before purchasing it in order to gage whether or not it would be worth my time, and all praised Conquest of the Missouri, The:

The 1909 story of the opening of the Northwest.

From the Back Cover  
Seen through the eyes of Capt. Grant Marsh, who was one of the greatest river pilots to ever navigate the shoals and rapids of "big muddy," this retelling of the opening of the Northwest is one of the classic narratives about the American West. In short, Captain Marsh watched Jackson's sense of American Manifest Destiny unfold. He helped survey the upper reaches of the Missouri, he took his steamer to the shallows of Little Bighorn to return battle-weary soldiers home, and he watched as the region was transformed from a lonesome wilderness into what would become modern America.
