From Peter Lang GmbH : Critique and Apologetics (Early Christianity in the Context of Antiquity) before purchasing it in order to gage whether or not it would be worth my time, and all praised Critique and Apologetics (Early Christianity in the Context of Antiquity):

This book contains 13 contributions from an international conference held in 2007. The idea of the conference was to investigate the confrontations and the cultural, philosophical and religious exchange between different religious groups

in antiquity and to establish a more comprehensive theory about what apologetics was considered to be both in the context of antiquity and from the perspective of modern scholarship: is it possible to define a literary genre called apologetics? Is it possible to talk about apologetics as a certain kind of discourse which is not limited to a special kind of texts? Which argumentative strategies are implied in apologetic discourses? The essays in this volume present a new approach to these questions.

(...) this volume should be praised for a clear level of consistency, as a common thread throughout the diverse contributions is the interpretation of apologetic writings from various perspectives. Therefore, anyone interested in the apologetic writings should take note of this volume, as the range of issues and topics dealt with leads to meaningful insights in these types of writings that are part of the literary Jewish, Christian and pagan traditions. (Danielle Slootjes, Bryn Mawr Classical )About the AuthorThe Editors: Anders-Christian Jacobsen is Professor of Systematic Theology in the Faculty of Theology at the University of Aarhus (Denmark). Jrg Ulrich is Professor of Early Church History in the Faculty of Theology at the University of Halle-Wittenberg (Germany).
