However, the extraordinary detail and immense research conducted has brought forward a very detailed, and disturbing document. Difficult to understand how awful the Poles were to their fellow countrymen. To torture innocent human beings through beatings,

rapes, starvation and inhuman work environment and living conditions is unimaginable. The Germans and their Polish collaborators will rot in hell. 3 of 4 people found the following review helpful. Must read By Stanley J.

Cherny Impressive book that describes, analyzes and chronicles the Skarzysko-Kamienna Slave Labor Camp. This is a little known place with a unique structure among the hundreds of forgotten camps. The author also provides a unique analysis of the economics of this camp and its social structure. The translation is rough in some parts but this book is the best overall book I have read about the camps, their social structure, organization, interations of liberation movements and economics. She also provides a unique insight into why many volunteered to enter the camp and provides much historical background and the links to other Concentration Camps including Plaszow, the camp where Oskar Schindler was associated. 3 of 7 people found the following review helpful. "Death Comes in Yellow" presents the history of one slave labor camp in order to shed light on all aspects of the slave labor camps established in Poland under German occupation. Hasag-Skarzysko was one of hundreds of camps scattered throughout occupied Poland. They were distinguished by size, the nationality of the prisoners, their location, the date of their establishment, and the authority in charge. The large number of labor camps reflected the German policy of exploiting the work forces of the occupied countries. These camps were part of a Europe-wide system of forced labor. The first part of this volume reviews the external history of the camp. The second section, which studies the internal workings of the camp, is quite different in approach and includes an analysis of prisoner society and a moving description of the individual prisoner's struggle to survive.
