MillerOnce you are introduced to it, the Dyatlov Pass incident has a way of grabbing hold of you and not letting go. This book gives an excellent account of the case and provides a detailed discussion of the most compelling theories of what happened to these unfortunate hikers. Be aware though that a couple of the included photos, although fascinating from an historical perspective, are quite disturbing to look at.The true strength of the book

derives from its clear and tidy presentation of the facts in the case. Plus it provides interesting tidbits of information not found elsewhere. Without giving anything away, reading this book will open your eyes regarding how many crucial details and significant aspects to the story have been overlooked or minimized in other published accounts on the subject. If you are interested in deepening your understanding of what actually transpired in this tragic incident, you will find "Dyatlov Pass" provides a refreshing perspective on this most famous of unsolved mysteries.

On the night of February 1 or early in the morning hours on February 2, 1959, an event occurred in the Ural Mountains of Russia that has never been satisfactorily solved. On that fatal night, nine hale and hearty, highly experienced ski hikers mysteriously died. Igor Dyatlov, Team Leader, and eight others: Zinaida Kolmogorova, Lyudmila Dubinina, Alexander Kolevatov, Rustem Slobodin, Yuri (Georgiy) Krivonischenko, Yuri Doroshenko, Nicolai Thibeaux-Brignolles, and Semyon Zolotariov perished under the most odd circumstances. When they failed to reach their return spot on time, parents and friends began to ask for a search party. But Yuri Yudin, who had been the tenth member of the group before illness and chronic pain made him turn back, said Dyatlov had added time to the group's return due to extra weight caused by dividing Yuri's burden among themselves. But that time passed as well, and a rescue mission found the tent deserted, cut through from inside; and a trail of footprints leading downhill into the forest. They had gone into negative centigrade temperatures in various states of undress. Two bodies, Krivonischenko and Doroshenko, were discovered at a large cedar, where the group had started a fire. Three, Dyatlov, Kolmogorova and Slobodin, were found between the cedar and the tent, obviously trying to make it back. But it would be until May fourth that the last four bodies were found, buried under several meters of snow in a ravine where they had partially created a shelter. Three of these bodies were horribly injured, two, Dubinina and Zolotarev had badly crushed chests; and Thibeaux-Brignolles suffered a major skull fracture. Dubinina was missing her eyes, tongue, and upper lip, which has been a subject of controversy since.

This covers the history of the event. What the authors have done is to present the known facts as clearly as possible, leaving out any fact that is actually speculation. They then begin to examine the plethora of theories that have been presented as possible solutions. As with most theories about unexplained phenomena, the theories are nice, but to make them fit the case often means either ignoring certain facts, or proposing things not indicated by facts. The authors then proceed to make their own theory known. Like the others, it is a bit of a stretch, but the authors are perfectly aware of that fact.

The point made by these authors, in this book (which I recommend to serious researchers of the Dyatlov Pass Incident), is that theories are all well and good but the fact remains that no one knows what really happened that fatal night. The only people who knew the real reason for abandoning the tent without protective clothing, to the merciless weather and bitter cold. All but three would die from hypothermia, and the other three died from injuries compared to an auto hitting them at sixty mph.

This book presents the facts in an orderly fashion, deals with other theories with due respect, and admits that their own theory has problems as well. My hat is off to these authors for such honesty and integrity. In unsolved mystery investigations, many insist upon their own theory even if it is shoddy at best. Complete honesty is a breath of fresh air. I give these brave authors five out of five stars! Well done!

Still perplexed after the autopsies by various Doctors, reports from rescuers and other government authority's. Why was the area closed off for three years. Another incident happened in the 1970s almost identical. Researchers running from their tent, perishing in the same manner. Dyatlov Pass does keep its secrets. Author stayed with the stated reports/facts of the Incident. Some authors try and put their outer world explanations to this incident but come no closer to the truth. excellent read.

In the winter of 1959, nine hikers vanished under eerie circumstances on the slopes of the Northern Ural Mountains in Russia. A month later their corpses were found, maimed and broken by eldritch forces. This incident has provoked wild speculation among even the most skeptical crowds, stimulated discussion among every conspiracy theorist in Russia, and haunted the imagination of many a hiker for half a century. Recently, the mystery of so-called "Dyatlov Pass" has undergone a renaissance of interest and has gained international publicity and coverage in the news, Hollywood, and literature. This book provides, in an easy-to-read format, comprehensive, bias-free coverage of the incident--complete with medical autopsy reports, excerpts from legal proceedings connected with the deaths of the hikers, and testimonies from the first responders who found the bodies. In short, this book contains everything one needs to join the ranks of thousands of people trying to uncover the secrets of the Dyatlov Pass.
