By Bobbananda - Dr Bob Midelfort opens up quite an extraordinary story of demons, devils, disease and healing via exorcism in the 18th century. The story focuses through the life and work of Father Johann Gassner who apparently helped and healed thousands but was denied and banned because of political and religious fears in the Holy Roman Empire. The details are a bit tedious at times, but the author handles the territory quite well. He did an excellent job with the material, times, and problems of the age.

In the late eighteenth century, Catholic priest Johann Joseph Gassner (1727-1779) discovered that he had extraordinary powers of exorcism. Deciding that demons were responsible for most human ailments, he healed thousands, rich and poor, Protestant and Catholic. In this book H. C. Erik Midelfort delves deeply into records of the time to explore Gassner's remarkable exorcising campaign, chronicle the official efforts to curb him, and reconstruct the sufferings of the afflicted. Gassner's activities triggered a Catholic religious revival as well as a noisy skeptical reaction. In response to those who doubted that he was really casting out demons, Gassner marshaled hundreds of eyewitness reports that seemed to prove his exorcisms really worked. Midelfort describes the enormous public controversy that resulted, and he demonstrates that the Gassner episode yields important insights into the German Enlightenment and Counter-Enlightenment, the limitations of eighteenth-century debate, and the ongoing role of magic and belief in an age of scientific enlightenment.

"This study of demonic possessions and exorcisms in the era of Enlightenment redefines our understanding of the way in which natural philosophy, medicine, and religion began to diverge after centuries of being intertwined. Midelfort raises his sights beyond the details, showing us that the Gassner controversy was a critical moment in the Western quest for an understanding of the self, and for mastery over the evils that bedevil every individual and society.
