From Palgrave Macmillan : Power and State Formation in West Africa: Appolonia from the Sixteenth to the Eighteenth Century before purchasing it in order to gage whether or not it would be worth my time, and all praised Power and State Formation in West Africa: Appolonia from the Sixteenth to the Eighteenth Century:

Looks at the political and social history of the Gold Coast in West Africa from the early 16th century to the second half of the 18th. The book examines how political entities in Nzema were structured territorially, as well as the formation of ruling groups and aspects of their political, economic, and military actions.

'The author provides important insight into the political development of one specific section of the Gold Coast and how regional participation in the Atlantic trade, and thus sustained contact with European traders and company officials, influenced this process. The author clearly shows how trade and cultural interaction influenced this political development, and provides an excellent example of the importance of interdisciplinary work to West Africa in this period. Highly recommended.' CHOICE About the Author PIERLUIGI VALSECCHI Professor of African History, Universit degli Studi di Pavia, Italy.
