By Robert Clark Kirchner I must say this little book was a lot more than I expected. I collect and paint military miniatures and this book was very useful for describing the large and small details for each of the units involved in the Lake George corridor. Although there are no color plates there are plenty of illustrations. The book gets right to the point and is a great resource for uniform and camp details. It even goes into some detail on camp followers. This is a great book for a wargamer, reenactor or figure painter.

By Michael N. Ryan An informative little book on the types of British and Colonial soldiers and their equipment of the Lake Champlain theater of the French and Indian war. Easy to read and extremely well illustrated. Very descriptive though I disagree with the author in describing colonial arms as Brown Besses. One of the biggest problems of Provincial troops was a shortage of firearms. Colonial Governments paid bounties to volunteers who provided their own. Half the men serving brought their own. The issue arms were mostly a mix of commercial military arms from London or Birmingham or imported from the Dutch plus discards from the Tower.

Illustrated by Joe Lee. The vital Lake George - Lake Champlain corridor, always a strategic link between New England and Canada, is the geographical setting of this study of the uniforms and clothing of British and Yankee soldiers and their Native American allies during the French and Indian War. Brief historical sketches of the British campaigns of 1755-1760 provide ample background information. A general description of the military clothing, gear and equipment issued during this period is followed by detailed descriptions of the items worn and used by the different groups: Yankee Provincials, Rangers and Light Infantry, Redcoats, Indian allies, and auxiliary troops. Sixteen informative appendices include: marching order and parade dress of the British army, descriptions of "small clothes," regimental lace, facing colors, examples of markings, clothing and gear issuance of 14 regiments and two Ranger units, and a description of British musicians' coats and gear.
