Having read the book previously, I wanted one for my own library. Now I need one for lending. An excellent eye opener. I Give it seven stars.1 of 1

people found the following review helpful. The person I got this book for really likes it. By optimo The person I gave this book to really likes it. They're into that show Ancient Aliens, so this book is a must have for that person, at least that is what I thought. I have read this book before and can honestly say that this is a pretty interesting book with some eye opening information. Would absolutely give another one of these books to another person again. 0 of 0 people found the following review helpful. Five Stars By Customer Very good book

An increasing number of historical and archaeological finds made around the world have been classified as "out-of-place artifacts" (ooparts). They have been called this because they appear unexpectedly among the ruins of the past with no evidence of a preceding period of development; their technological sophistication seems far beyond the capabilities of ancient peoples. Drawing on the literature and art of the Chaldeans, Sumerians, Babylonians and others, Rene Noorbergen's contention is that a superior race of man was responsible for these scientific marvels that bear testimony to a civilization with technology comparable to our own.
