From J William Harris : Society and Culture in the Slave South (Rewriting Histories) before purchasing it in order to gage whether or not it would be worth my time, and all praised Society and Culture in the Slave South (Rewriting Histories):

Combining established work with that of recent provocative scholarship on the antebellum South, this collection of

essays puts students in touch with some of the central debates in this dynamic field. It includes substantial excerpts from the work of Eugene Genovese and Elizabeth Fox-Genovese, who lay out the influential interpretation of the South as a 'paternalistic' society and culture, and contributions from more recent scholars who provide dissenting or alternative interpretations of the relations between masters and slaves and men and women. The essays draw on a wide range of disciplines, including economics, psychology and anthropology to investigate the nature of plantation and family life in the South. Explanatory notes guide the reader through each essay and the Editor's introduction places the work in its historiographical context.

"This collection should quickly become widely adopted...it offers an excellent selection of the very best recent scholarship in the field."-Kenneth S. Greenberg, Suffolk University, Boston "A very useful collection of articles that highlights some of the principle debates in the history of the Old South."-Drew Faust, University of Pennsylvania
