The personal accounts and other information used in the writing of this book really pulls you in. So much good information paired with a captivating story, made this such a delight to read.0 of 0 people found the following review helpful. Great StoryBy John McConnellGreat story and

possibly a great writer. Beginning with the rocket men of the late 1940s and early 1950s and concluding with the NASA astronaut program it spins quite a tale. Enjoyed reading and was hard to put down. 0 of 0 people found the following review helpful. Aim high - a must read By FLHappyGirlI devoured this book; I just finished reading it on the anniversary of the moon landing. This book is a must read for anyone interested in space or for people with sheer determination to succeed aim high in life

From "America's nerviest journalist" (Newsweek)--a breath-taking epic, a magnificent adventure story, and an investigation into the true heroism and courage of the first Americans to conquer space. "Tom Wolfe at his very best" (The New York Times Book Review)Millions of words have poured forth about man's trip to the moon, but until now few people have had a sense of the most engrossing side of the adventure; namely, what went on in the minds of the astronauts themselves - in space, on the moon, and even during certain odysseys on earth. It is this, the inner life of the astronauts, that Tom Wolfe describes with his almost uncanny empathetic powers, that made *The Right Stuff* a classic.

Technically accurate, learned, cheeky, risky, touching, tough, compassionate, nostalgic, worshipful, jingoistic . . . *The Right Stuff* is superb. The New York Times Book One of the most romantic and thrilling books ever written about men who put themselves in peril. The Boston GlobeAn exhilarating flight into fear, love, beauty, and fiery death . . . Magnificent. PeopleAbsolutely first class . . . Improbable as some of Wolfe's tales seem, I know he's telling it like it was. The Washington Post Book WorldCrammed with inside poop and racy incident . . . fast cars, booze, astro groupies, the envies and injuries of the military caste system . . . Wolfe lays it all out in brilliantly staged Op Lit scenes. TimeSplendid . . . It shows our propensity to manufacture heroes, and, just as quickly, to forget them; it shows how a scientific program was exploited for political advantage; it provides a revealing character study of seven exceptional Americans. The Saturday From the Inside FlapWhen the future began... The men had it. Yeager. Conrad. Grissom. Glenn. Heroes ... the first Americans in space ... battling the Russians for control of the heavens ... putting their lives on the line. The women had it. While Mr. Wonderful was aloft, it tore your heart out that the Hero's Wife, down on the ground, had to perform with the whole world watching ... the TV Press Conference: "What's in your heart? Do you feel with him while he's in orbit?" *The Right Stuff*. It's the quality beyond bravery, beyond courage. It's men like Chuck Yeager, the greatest test pilot of all and the fastest man on earth. Pete Conrad, who almost laughed himself out of the running. Gus Grissom, who almost lost it when his capsule sank. John Glenn, the only space traveler whose apple-pie image wasn't a lie.About the AuthorTom Wolfe is the author of a dozen books, among them such contemporary classics as *The Electric Kool-Aid Acid Test*, and *I Am Charlotte Simmons*. He lives in New York City.
